PREFACE

The ETNA Trader Manual © 2002 - 2015 by ETNA

All Rights Reserved

The instructions provided here relate to both Live Trading Accounts and Demo Accounts.

Please, feel free to contact us if you have any questions.

You can also contact support and leave us feedback, suggestions, and insights about ETNA Trader through <u>Support Contact</u> on our demo.

INTRODUCTION

When you first begin working with ETNA Trader, you'll want to know some basics: How do I register? How do I change my password? What am I looking at? Where are the widgets and how to use them? How to place orders? How do I get help? All those basics are covered in this guide to help you familiarize yourself with ETNA Trader platform in an effective and faster way.

About this document

This User Guide sets forth the procedures and descriptions of how to use ETNA Trader Platform, starting from the registration process to the sophisticated trading activities. This document:

- 1. Describes each component and window in the Trading Platform.
- 2. Explain the purpose and the functionality of every widget and tool.
- 3. Defines and explain the procedures for trade placements and verification.
- 4. Showcase the ways to personalize and customize the platform to meet your specific needs and preferences.

Note: Information provided in this user guide regarding the software or functionality of the Trading Platform, including descriptions and illustrations (i.e. screen shots), are subject to any updates and changes by ETNA.

PLATFORM NAVIGATION

Demo Subscription

- **Demo Account Registration:** The first step to create a demo account is to fill and complete the Demo Account Registration form. If you have already created a demo account, you can just log in to the platform by entering your username and password.
- Contact Support: If you have queries about the signup or you would like to send your feedback about the platform, you can do so by simply clicking on contact support located in the upper right side. You can also use Contact Support anytime while using the platform in case you have any question you might not find in this user guide. ETNA Trader Contact Support allows you to give us your feedback wordily and visually, through attaching up to 5 files to support your message and make sure that the end user and ETNA's team are at the same page and visually seeing the same point.
- Language: ETNA Trader provides users with multilingual support. You can change languages of your ETNA Trader terminal and the changes will take effect right away, without the need to restart the program again. ETNA Trader showcases four languages in the demo, but we can always integrate more languages to the platform based on the user's desired language he wants to be integrated in ETNA Trader's terminal.

Getting Started!

Once you complete and submit all the information in the account registration window, a message will pop up confirming the successful completion of your registration along with a brief note of the demo's account offers.

Icons and symbols of ETNA Trader

ETNA Trader is loaded with icons and symbols that when clicked on, they give you the chance to customize and personalize the interface of the platform as if it's created to meet your specific needs and preferences. So, before we dive into the platform, we would like to give you a quick rundown of each icon, what they are and what they exist. Check this partial cheat sheet.

		Description				
Icon	Name	Description				
C	Log Off	Sign out from your ETNA Trader user account				
	Settings	Edit and make changes to the platform interface (ex: account, trading accounts, trading, layout settings, personalization)				
Trade 😧	Tab Settings	Add more tabs, name/rename tabs and delete tabs				
	Widget Settings	Enbales you to edit and customize the widget (Settings differ from one widget to another)				
0	Add Tab	Enables you to add extra tabs to the platform				
	Manage Columns	Enables you to select the columns you want to keep and remove in widgets				
+	Create New Watchlist	Enables you to create and add new Watchlists				
	Marquee Settings	Enables you to edit the display of real time quotes of securities				
Ŧ	Pinned Header Panel	Enables you to pin header panel (Marquee listing and widget panel)				
÷.	Unpinned Header Panel	Enables you to unpin header panel (Marquee listing and widget panel)				
日本	Locked Layout	Enables you to lock your last updated layout When you lock your layout you can not add and/or delete any of the changes made				
	Unlocked Layout	Enables you to unlock your layout and make edts by adding, deleting and relocating the widgets within the platform				
	Contact Support	Enables you to report any question, feedback about the platform				
	Language	Enables you to change the language of the platform features				
	Group	Enables you to assign widgets to the same color group so you can connect all widget together by one click				
	Maximize	Maximize the widget window				

Dashboard

ETNA Trader has an easy-to-navigate dashboard. Users can group Watchlist with News feed and chart. Connecting the three widgets together allows users to check the latest news and chart of the security automatically once the symbol is typed.

Account Page

Account page contains the name and account number(s) of the user. In the account information, you will see that you have access to 1M in virtual currency to test your trading skills with, as you see in the graphic below. There are different types of other widget tabs such Trade, Market watch, analyze and more.

You can also delete tabs of widgets you don't currently need to use for your trades.

You can add more tabs by clicking the plus (+) symbol, rename it and reorganize the order of your tabs by dragging them either forward or backward.

By clicking on The Header Panel tab you can either pin or unpin the Marquee Settings bar and the Widget bar.

User Setting

User Settings enables you to customize your layout,update the time zone, personal information, trading options as well as add your own picture. User settings contains four parts: Account, Trading, Layout Settings, and Personalization.

		User Settings			×

]	OK Cancel		

Marquee Settings

ETNA Trader's Marquee streams security information in the most flexible real-time quote displays. With ETNA Trader's Marquee, you can combine real-time data of securities in a variety of customizable displays. The content of Marquee can be customized in three different models.

- 1. Positions: Marquee that shows updated quotes of all the symbols you traded and created a position for
- 2. WatchList: Marquee that shows updated quotes of the three different types of securities: Stocks, Forex or Indices.
- 3. Custom: Customize marquee that shows updated quotes of your specifically preferred symbols

Tabs

ETNA Trader's interface is designed to make it easy for users to find features, place and organize widgets as they want. Each tab is customizable and can contain any component the user chooses from our widget list. By scrolling the drop-down menu of "Add Widget", click on the picked widget and it will be automatically added to the tab menu. You can also create and add extra tabs and label them to break down your trading tasks into simple actions.

Group Settings

ETNA Trader allows you to group your watchlist with other widgets, such as news, charts, stock info and more. When all widgets are grouped together by the same tag color, that would make your terminal more efficient and practical for trading. You can just click on the ticker symbol of the company in your watchlist to view real-time chart, news, stock info and more about the company, all with one tap.

WIDGETS

ETNA Trader comes with a variety of widgets that you can use to get the most productive trading experience. The goal behind "Add Widget" tab is to make sure there is a place where you could always have easy access to all trading tools. ETNA Trader's widgets appear on the

right-hand side of the platform and are always there no matter what tab you are on. If you don't want them taking up space, you can always collapse them by clicking "Save Layout".

Save Layout: To show or hide the tab "Add Widget", edit and save layout

Add Widget:

To add a widget, click on the "Add Widget" menu and then pick on the component to load

Account information

ETNA Trader's account information is designed to display the user's real-time information about all trading activities, account value, buying power and more. It also determines the date when the account was created and was last used.

Account Info			☆ □×

Chart

In order to view the market from nearly every conceivable angle, ETNA Trader offers different chart types that stream up-to-date data. From candlesticks to bar, every chart type updates data automatically as it unfolds. You can also choose to show a chart in four different modes:

- Line
- Bar
- Candle sticks
- OHLC (Open-High-Low-Close)

The drawing tools menu allows the user to select from a number of different drawing tools. Drawing tools overlap the price data and can be used to mark-up the charting area. Drawing tools include Fibonacci, trend lines, support or resistance (price range) and text notes.

Chart and geometries panels

Users have the option to hide and unhide both chart and geometries panels as it shows in the following posts:

Customize your chart

The charting menu bar shows different options that can be expanded and used to select the time frame, chart type, technical indicators, apply comparisons to other securities, and draw different trend lines and shapes. The

chart also provides access to many other features and settings, including being able to trade from the charts, change the style/ appearance of chart and the time frame as well as add technical analysis tools.

News

ETNA Trader's news widget gives you live streaming headlines from different online news sources. If there is an important news story in business, around the world, it will probably going to show up in the Live News tape. You can click on the headline to get the full story. You can also link your watch list with the news feeds, so that every time you want to know the latest news about a security, you can just click on it from the watch list to see updated news headlines.

Trade Ticket

ETNA Trader enables you to execute trades in different ways.

Trade Ticket: You can add the widget Trade Ticket to place an order. By using the widget Trade Ticket, you can place **three types of trades**: Simple, OTO or OCO. To place an order, you enter the symbol name, number of shares, the exchange market (auto, Nasdaq, NYSE, KNIGHT), **order type** (Market, Limit, Stop, Stop Limit, Trailing Stop, Trailing Stop Limit) and the duration of the trade: Day or Good Till Canceled. You can place your order right after you finish filling the entries of the ticket.

Types of Trades

• Simple

Duration	All or none	Price	
Day 🔻	V	=	
Buy	Sell	Sell Short Buy To Cover	
Symbol	Last	- Change -	
Volume	- Bid	- Ask -	

OTO: One Triggers the Other

A one triggers the other orders involves two orders—a primary order and a secondary order. The primary order may be a live order at the marketplace. The secondary order, held in a separate order file,

OCO: One Cancel the Other

A one-cancels-the-other order (OCO) combines a stop order with a limit order on an automated trading platform. When either the stop or limit level is reached and the order executed, the other order will be automatically canceled.

Types of Orders

Chart: You can intuitively place and manage trades directly on a chart. Once clicking on the candlestick, the trade ticket pops up so you can place your order.

Watchlist

ETNA Trader's watchlist is designed to be sortable and filterable to help traders make decisions quicker (this is especially important when trading options as it helps determine the entry strategy). You can create your own watch list based on which groupings of stocks you would like to see in one view (available in demo mode). The graphs below show the steps of creating your own watch list (ex: My Technology watch list)

Stepl Create a new watchlist: Click on the plus sign to a create and add a new watchlist

Orders

Before you start conquering the world of trading, ETNA Trader gives you the chance to users to trade with virtual money for product evaluation, trading educational or to test their trading strategy to experience the full range of ETNA Trader's trading capabilities in a real-time market environment, without risking any of your own money. All customers will start with USD 1,000,000 of paper trading. You can use all ETNA Trader's order types, trade all securities available in your demo account. Every trade entered into your ETNA Trader's paper trading account will not actually execute on any exchange or settle at a clearing house. However, the price of your executions will be determined by real market prices and sizes.

Create an order

There are two ways to create an order on ETNA Trader's platform:

- 1. Option 1: type in the symbol in the box in the upper left side of the order widget
- 2. Option 2: click on the symbol from your watchlist

Types of orders

Users can set the type of order they want to place from Trade Ticket, Option Ticket widgets, or popups trade ticket when they click on the symbol from the watchlist or a chart.

Sides of orders

Duration of orders

Duration means how long an order will remain in the market until it is canceled. Users can set their preferred duration from Trade Ticket, Option Ticket widgets or popups trade ticket when they click on the symbol from the watchlist or a chart.

- 1. Day A day order automatically expires at the end of the regular trading session if it has not been executed.
- 2. GTC Good-till-Canceled An order that lasts until it's completed or it's canceled.

Orders widget features:

- 1. Column Manager: Users can add or remove columns they need
- 2. Order filter: Users are able to sort your orders list by: symbol, order status, order type
- 3. Last added order will be shown even if you set a filter that isn't suitable for a new added order

Positions

Once an order is placed in the market, the user will be able to see it on the position widget. Users can manage the components they want to see in their position widget.

Positions widget features:

- 1. Column Manager: With Column Manager you can add/remove columns that you are needed.
- 2. Related orders: With related orders the user can see every transaction (each order which formed a position) in a position. You can switch it on in the Settings popup.
- 3. Closed position: will be displayed until a new trading session starts (Clearing imitation).

Position components:

Like orders, the position widget displays a list of components that the user can either choose to add them all, or add the ones he prefers

Greeks

Various sophisticated hedging strategies are used to neutralize or decrease the effects of risk when taking a position in an option.

Calls and Puts

The two types of options are calls and puts: calls and puts.

There are four types of participants in options markets depending on the position they take:

- 1. Buyers of calls
- 2. Sellers of calls
- 3. Buyers of puts
- 4. Sellers of puts
